

ADD*motion*™

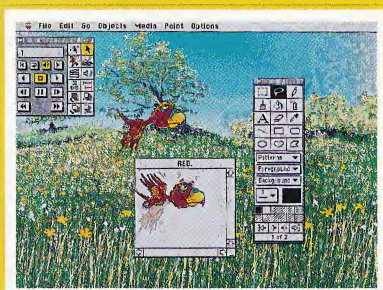

Animation & Color Paint For HyperCard® 2.0

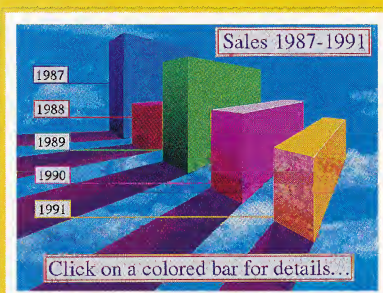

Motion Works™

An intuitive user interface employs a path-based, point-and-click method for creating animations easily and effectively.

Create and edit B&W or color images as "Props" or multi-cel "Actors" which can be aligned using ADDmotion's "onion-skinning" capability.

Create truly interactive animations using "Cues" that send HyperTalk messages to HyperCard. Any "Cue" can invoke any HyperCard script including XCMD's that control devices such as MIDI, CD-ROM, and Videodisc players.

Printed in Canada

ADDmotion

ADDmotion™ is the first animation and color paint program to be fully integrated within HyperCard® 2.0. With ADDmotion you can quickly and easily add animation, color and sound to any HyperCard stack. ADDmotion can be used by anyone who wants to create exciting presentations, develop interactive training systems, or simply have fun.

PRODUCT FEATURES

- Intuitive user interface.
- Path-based animation.
- Built-in color paint program including support for 24-bit color graphics.
- "Onion-skinning" in the paint module enables easy and accurate registration of cels within an "actor."
- Add interactivity using HyperCard's HyperTalk™ scripting language.
- Sound input/output including multiple sound channels and sound editing capabilities.
- Import/Export capabilities including PICT, PICT2, PICS, MacPaint®, and Scrapbook files.
- Royalty free distribution of your ADDmotion creations using a small ADDmotion runtime XCMD.

SYSTEM REQUIREMENTS

- HyperCard 2.0 or greater
- System 6.0.7 or greater
- B&W requires 2MB of RAM
- Color requires 2MB minimum of RAM (4MB of RAM recommended)
- Hard disk required

COMPUTERS SUPPORTED

- Macintosh Portable
- Macintosh Plus, SE, Classic, SE/30
- Macintosh II family
